

# SUYASH GUPTA

📞 +91-7017460040 ✉️ guptasuyash9@gmail.com 🔗 LinkedIn 🐙 GitHub </> LeetCode

## Technical Skills

---

**Languages & Core:** JavaScript (ES6+), TypeScript, SQL, NoSQL, HTML5, CSS3  
**Frontend Architecture:** React.js, Redux Toolkit, Next.js, Server-Side Rendering (SSR), Micro-Frontends  
**Backend Development:** Node.js, Express.js, Spring Boot, RESTful APIs, Microservices Architecture  
**Databases & Caching:** MongoDB, PostgreSQL, MySQL, Cassandra, CosmosDB, Redis, ElasticSearch  
**DevOps & Cloud:** AWS (EC2, S3), Azure, Docker, Kubernetes, Jenkins, CI/CD Pipelines, Linux  
**Observability & Tools:** Kibana, New Relic, Logstash, Git, JIRA, Postman, Agile/Scrum  
**Achievements:** Solved **500+** **DSA problems** across LeetCode, Scaler, and GeeksForGeeks.

## Experience

---

- Times Network** | *Senior Software Engineer* Jan 2023 – Present
- Engineered a high-performance SSR architecture using **Astro** and **Express**, slashing page load latency by **45%** and compressing HTML bundle size by **50%**.
  - Orchestrated a robust cache-purging mechanism on Akamai integrated with **Node.js**, enhancing content freshness while monitoring system health via Kibana and New Relic.
  - Revamped the high-traffic "Top 10" aggregation pages utilizing **ElasticSearch**, which accelerated data retrieval speeds by half (50%).
  - Spearheaded major release cycles for TimesDrive and Times Galaxy, driving a **70% surge** in monthly page views through optimized delivery pipelines.
  - Refined the MongoDB database schema, eliminating bottlenecks and boosting query execution performance by **30%**.
  - Automated deployment workflows via Jenkins CI/CD, curtailing production downtime by **30%** during release windows.
- Infogain** | *Senior Software Developer* Jan 2022 – Jan 2023
- Optimized legacy Node.js endpoints, achieving a **30% reduction** in API response latency through code refactoring and asynchronous handling.
  - Deployed **Redis** caching layers to intercept frequent database calls, enabling **25% faster** content retrieval for end-users.
- Capgemini** | *Full Stack Engineer* Apr 2019 – Jan 2022
- Modernized React.js user interfaces with reusable component libraries, cutting project delivery timelines by **20%**.

## Key Projects

---

- TimesDrive** | *React.js, Node.js, CosmosDB*
- Designed complex data modeling workflows handling 2,000+ vehicle specifications, elevating API throughput by **30%**.
- URL Shortener Service** | *Node.js, Express, MongoDB*
- Built a high-availability link management tool for internal sales teams, boosting influencer campaign engagement by **30%**.
  - Enhanced the conversion funnel by **25%** through rigorous UI/UX optimization and A/B testing support.
- HealthAndMe** | *Full Stack Development*
- Overhauled the search indexing and content recommendation engine, expanding user access to medical expert guidance by **30%**.
- Digit.in** | *Backend Architecture*
- Contributed critical backend infrastructure supporting **10M+ monthly active users**, helping secure the #1 Tech Site ranking in India (ComScore).

## Education

---

**GL Bajaj Institute of Technology and Management** Uttar Pradesh, India  
*Bachelor of Technology in Computer Science (CGPA: 7.8/10)* 2019
